### EMAIL

pintoo.star4146@gmail.  
com

### LOCATION

Indore, INDIA

### EXPERIENCE

3 Years 2 Months

## PROFILE SUMMARY

Experienced in Spring Boot API development, driving a 20% efficiency boost in application performance. Proficient in GitOps, ArgoCD, and AWS services (EC2, S3, Lambda, RDS). Skilled in automating processes with Argo Workflow and Python, ensuring timely project delivery within agile sprints. Passionate about cloud deployment and monitoring, including Grafana dashboards for CloudWatch logs.

Ready to collaborate on building intelligent applications!

## WORK EXPERIENCE

### Software Engineer

Impetus Technologies

Jul 2021 - Present

## KEY SKILLS

- Core Java Skills: Java 8+ J2EE Spring Boot Hibernate RESTful APIs Frameworks and Libraries: Spring Framework Spring Security JPA Microservices DevOps Tools: Git GitOps Jenkins ArgoCD Cloud Platforms: AWS (EC2 S3 RDS Lambda) CloudFormation AWS Redshift Other

## EDUCATION

### B.Tech/B.E. - Computers

2021

Mahatma gandhi central university

Grade - 7.1/10

12th

2016

Technologies: Python SQL  
Docker Grafana Kubernetes

## CERTIFICATION

- SQL  
11/2022 - Does not expire
- Java  
01/2022 - Does not expire
- React js  
01/2023 - Does not expire
- Introduction to Linux  
02/2023 - Does not expire
- Prompt Engineering for Everyone  
02/2024 - Does not expire

## PROJECTS

### MARS

24 Months

Backend Developer | MARS ML Platform

- Developed Spring Boot backend services, enhancing application efficiency by 20%.
- Designed and deployed APIs, streamlined GitOps and ArgoCD deployments on AWS.
- Automated test removal with Argo Workflow and Jira tasks with Python, improving task management.
- Implemented role switching and release version display for better system flexibility.
- Met sprint deadlines consistently, contributing to a 30% team efficiency boost.
- Provided technical support, fostering a collaborative team environment.

### Online grossary ordering system

7 Months

- Led full-stack development of a scalable web app for online grocery shopping, enhancing user experience.
- Developed Order microservice and RESTful APIs, streamlining order management.
- Implemented backend logic with Spring Boot and secured user access with JWT authentication.

### migration

7 Months

- Orchestrated migration of a data warehouse from Teradata to AWS Redshift, boosting scalability by 40% and performance by 30%.
- Extracted DDL scripts from Teradata with precision, ensuring accurate schema extraction.

I have been acknowledged for getting hands on all services & frameworks, which are required for the project, and worked on the assigned tasks. My out of box thinking and zeal to learn are appreciated.

- Reviewed and validated converted code, ensuring adherence to AWS Redshift standards and optimal SQL query performance.
